### General risks in Cryptocurrency (virtual currency) and/or CFD trading on spot and/or margin

Trading Cryptocurrency and/or CFD on spot and/or on margin (i.e. using leverage) is not suitable for everyone. Investing in such instruments involves a high degree of risk of loss. Before trading on spot and/or margin you should be aware of the risks involved due to the fluctuation in the value of such instruments' prices, which can cause fluctuations in the value of your investment. Any type of market or trade speculation that can yield an unusually high return on investment is subject to unusually high risks. Large losses may be suffered within a relatively short period of time due to adverse market

movements or to position build-up. Before deciding to enter into Cryptocurrency (virtual currency) or CFD trading on spot and/or margin, you should carefully consider your investment objectives, level of experience, and risk appetite. You should only trade the portion of your own assets you are disposed and cannot afford to lose entirely: only your surplus funds should be placed at risk and if you do not have such surplus funds you should imperatively avoid engaging in trading. In case of doubts on the risks related to Cryptocurrency (virtual currency) and CFD trading on spot and/or margin you should consult any independent financial advisor and request any necessary information.

### **Brokerage Service**

Frank Digital AG makes no representation or warranty as to the actual performance of the trades executed on behalf of the investor through Frank Digital AG brokerage. Frank Digital AG executes trades on behalf of the client which corresponds to the trades carried out in respect of a client order. Some strategies operate with leverage due to the use of margin products and a high degree of discretion and exposures towards single financial instruments and asset classes, and Frank Digital AG brokerage service may therefore entail significant risks.

All investments entail risks and may result in both profits and losses. In particular, investments in leveraged products, such as, but not limited to cryptocurrencies, foreign exchange, derivatives and commodities can be very speculative and profits and losses may fluctuate both violently and rapidly. Speculative trading is not suitable for all investors and all recipients should carefully consider their financial situation and consult financial advisor(s) in order to understand the risks involved and ensure the suitability of their situation prior to making any investment, divestment or entering into any transaction.

Past performance is not a guide to future performance and should not be the sole factor of consideration when selecting an investment portfolio or an asset, or a financial instrument. The price of the investments may go up or down and the investor may not get back the amount invested. Your income is not fixed and may fluctuate. The value of investments involving exposure to cryptocurrencies and/or foreign currencies can be affected by exchange rate movements. You are reminded that the levels and bases of, and reliefs from, taxation can change.

Frank Digital AG shall not be liable for (i) any loss which the investor may suffer as a consequence of the trading and transactions executed by Frank Digital AG; (ii) any loss suffered or incurred by the investor as a result of or in connection with Frank Digital's AG provision of brokerage service; (iii) any loss due to actions taken by Frank Digital AG according to its rights; (iv) any consequential or other indirect loss (including loss of profit and loss of goodwill) suffered or incurred by the investor whether arising from Frank Digital's AG negligence or otherwise; or (v) any loss exceeding Frank Digital's AG revenue on the account(s) or cryptocurrency wallet(s) of the client for any 12 month period prior to the client's raising of a claim against Frank Digital AG.
